Thin Solid Films 313–314 (1998) 838–850

thin solid films

Subject Index of Volumes 313–314

AFM
In situ ellipsometry; Si:H; Atomically flat c-Si(111) surface, 420
Air–water interface
Ellipsometry; Anisotropy; Langmuir monolayers; Molecular packing, 785
AlGaN
Gallium nitride; Aluminum nitride; Ellipsometry; Vacuum ultraviolet; Optical properties, 745
Alkali halides
Infrared ellipsometry; Reflectivity; Lattice vibrations, 687
Aluminium
Conversion coatings; Chromium phosphate; SE, 727
Spectroscopic ellipsometry; Infrared region; In situ monitoring/real time monitoring; Chemical vapor deposition; Integrated circuit technology, 737
Aluminum nitride
AlGaN; Gallium nitride; Ellipsometry; Vacuum ultraviolet; Optical properties, 745
Amorphous Si
Analytic representations; Dielectric functions; Crystalline Si; Silicon nitride, 132
Amorphous carbon
Infrared ellipsometry; Vibrational properties; Interfaces; Ion bombardment; Microstructure, 704
Amorphous films
Optical properties; Ellipsometry, 210
Amorphous materials
Silicon nitride; Spectroscopic ellipsometry; Tauc-Lorentz; Anti-reflection coatings, 193
Amorphous semiconductors
Real-time spectroscopic ellipsometry (SE); Multichannel SE; Rotating-element SE; Thin film nucleation and growth; Nanophase materials; Solar cells, 18
Amorphous silicon–carbon alloys
Spectroscopic ellipsometry; Graded layers; Parameterization of dielectric functions, 474
Amorphous silicon
Ellipsometry; Infrared spectroscopy; Silicon dioxide; Optical properties; Structural properties, 671
Analytic representations
Dielectric functions; Crystalline Si; Amorphous Si; Silicon nitride, 132
Anchoring effect
Polarization modulated spectroellipsometry; Nematic liquid crystals; Homogeneous–homeotropic transition; Dynamics, 799
Anisotropic crystals
Potassium acid phtalate; Spectroscopic ellipsometry; Ordinary refractive index; Extraordinary refractive index, 347
Anisotropic dielectric functions
Ellipsometry; Mercuric iodide; Surface aging, 351
Anisotropic materials
Generalized ellipsometry; Ellipsometry calculations; Mueller matrices; Depolarization; Parameterization of optical functions, 33
Anisotropic thick film
Polymer film; Mueller matrix of anisotropic samples; Transmission ellipsometry, 808
Anisotropic
Plastic; Ellipsometry, 814
Anisotropy
Generalized ellipsometry; Optical Jones matrix; Liquid crystals; Refractive indices; Polycrystalline media; Magneto-optics, 323
$YBa_2Cu_3O_{7-\delta}$; Spectroscopic anisotropy micro-ellipsometry (SAME), 362
Reflectance-difference spectroscopy (RDS); Interface; SiO_2/Si; ZnSe; GaN, 544
Infrared ellipsometry; Mixed-phase thin films; Effective medium theory, 692
Titanium; Zirconium; Passive films; Epitaxy, 756
Ellipsometry; Langmuir monolayers; Air–water interface; Molecular packing, 785
Annealing
Spectroscopic ellipsometry; Porous silicon; Oxidation, 459
Anti-reflection coating
Ellipsometry; Reflectometry; Silicon nitride; Photolithography, 198
Anti-reflection coatings
Silicon nitride; Spectroscopic ellipsometry; Amorphous materials; Tauc-Lorentz, 193
Anti-reflective (AR) coating
Spectroscopic ellipsometry; Photolithography, 742
Arsenic-phosphorus exchange
Spectroscopic ellipsometry; Kinetic ellipsometry; MOVPE; In-situ monitoring; Organic group V precursors, 604
Atomic force microscopy (AFM)
Chemical vapor deposition (CVD); Spectroscopic ellipsometry (SE); Multilayers, 259
Atomic force microscopy
Polycrystalline silicon; Spectroscopic ellipsometry; Surface roughness, 243
Plasma immersion ion implantation; Spectroellipsometry; Rutherford backscattering spectrometry; Surface disorder; Surface roughness, 254
Wafer bonding; Spectroscopic ellipsometry; Silicon materials; Tungsten silicide, 276
Atomically flat c-Si(111) surface
In situ ellipsometry; AFM; Si:H, 420
Attenuated Total Reflection
Infrared ellipsometry; Lubricants; Water, 718
Attenuated total reflection

Elsevier Science S.A.

Infrared ellipsometry; Oxygen plasma; Organic polymer, 713
Automatic
In-line; Ellipsometry; Mapping; Processing, 446

BST
SE; Sol-gel method; Cauchy dispersion function, 214
Backpropagation neural networks
Spectroscopic ellipsometry; SIMOX; Porous-Si, 149
Backscattering
Depolarization; Imaging; Phase modulation; Polarization; Turbidity, 831
Band gap
Silicon-germanium; Dielectric function; Spectroscopic ellipsometry; Strain, 167
Band structure
Piezobirefringence; Stress-optical constants; Deformation potentials, 10
Ru_2Si_3; Ellipsometry; Dielectric function; Optical properties, 218
Beam profile reflectometry
Silicon on insulator; Spectrophotometry; Global optimization, 270
Beam-profile ellipsometry
Spectrometry; Beam-profile reflectometry; Spectroscopic beam-profile ellipsometry; Titanium nitride, 308
Beam-profile reflectometry
Spectrometry; Beam-profile ellipsometry; Spectroscopic beam-profile ellipsometry; Titanium nitride, 308
Birefringence
Ellipsometry; Thin film, 368
Bonded silicon on insulator (SiO_2) on silicon (BOSI)
Thickness gradient materials; PCSA spectroscopic ellipsometry; Degree of polarization; Microspot spectroscopic ellipsometry, 102

Calcite
Generalized ellipsometry; Optical properties, 341
Carbon
Optical properties; Dielectric function; Germanium, 172
Cauchy dispersion function
SE; BST; Sol-gel method, 214
CeO_2
Spectroscopic ellipsometry; Multiple sample analysis; Ta_2O_5; ScN, 114
Characterization of surfaces, interfaces
Spectroscopic ellipsometry; Dielectric functions; Real-time monitoring and control; Thin films; Multilayer structures; Non-destructive, 1
Chemical vapor deposition (CVD)
Atomic force microscopy (AFM); Spectroscopic ellipsometry (SE); Multilayers, 259
Chemical vapor deposition
Spectroscopic ellipsometry; Infrared region; In situ monitoring/real time monitoring; Aluminum; Integrated circuit technology, 737
Chiral thin film
Rotating-compensator multichannel ellipsometer; Helicoidal bianisotropic medium; Glancing angle deposition; Multichannel Stokes vector spectroscopy, 373
Chromium phosphate
Conversion coatings; Aluminium; SE, 727
Compensator ellipsometry
X-ray specular reflectivity; Transparent materials, 68
Complete wetting
Spectroscopic ellipsometry; Molecular dynamics; Polymer liquids, 819
Composition profiling
Spectroscopic ellipsometry; Dielectrics, 389
Composition
Photo-modulation; Ellipsometry; Field; Real-time; FKO, 579
Condensation
Ellipsometry; Silicon surface; Tellurium, 561
Condition
Ellipsometry angles; Wavelengths; Resolution; High performance semantic database, 119
Control
Ellipsometry; Scattering; Real-time; Si; SiGe, 406
In situ ellipsometry; Thickness; Temperature; Wavelength, 479
Conversion coatings
Chromium phosphate; Aluminium; SE, 727
Critical points
Fourier analysis; Spectroscopic ellipsometry; Reflectance; Filtering, 143
Crystalline Si
Analytic representations; Dielectric functions; Amorphous Si; Silicon nitride, 132
Crystalline Si
Rotating-compensator ellipsometer (RCE); Least-squares analysis; Pseudodielectric function, 58
Cubic boron nitride
In situ diagnostics; Polarized FTIR reflectometry; VIS ellipsometry, 697

Deformation potentials
Piezobirefringence; Stress-optical constants; Band structure, 10
Degree of polarization
Bonded silicon on insulator (SiO_2) on silicon (BOSI); Thickness gradient materials; PCSA spectroscopic ellipsometry; Microspot spectroscopic ellipsometry, 102
Depolarization
Generalized ellipsometry; Ellipsometry calculations; Anisotropic materials; Mueller matrices; Parameterization of optical functions, 33
Mueller matrix; NE; RAE; PCSA; PSA, 90
Ellipsometry; Mixed polarizations; RDS; Wedge-like layer, 97
Backscattering; Imaging; Phase modulation; Polarization; Turbidity, 831
Deposition rate
Real-time spectroscopic ellipsometry; Diamond thin films; Surface temperature; Film properties, 506
Depth inhomogeneity
Ellipsometry; Silicon oxide; Silicon oxynitride, 379
Diamond thin films
Real-time spectroscopic ellipsometry; Surface temperature; Deposition rate; Film properties, 506
Dielectric constants
Spectroscopic ellipsometry; SIMOX; Si; Size dependence, 264
Dielectric films
Spectroscopic ellipsometry; Multiple minima, 124
Inhomogeneous films; Index gradients; Ellipsometry, 333
Dielectric function modeling
InAlAs dielectric functions; Process monitoring; Strained layer epitaxy, 177
Dielectric function
Ellipsometry; Optical modeling; Silicon, 161
Silicon-germanium; Spectroscopic ellipsometry; Band gap; Strain, 167
Optical properties; Germanium; Carbon, 172
Ru_2Si_3; Band structure; Ellipsometry; Optical properties, 218
Second harmonic generation; Microscopic theory; GaAs; GaP, 574
GaAs; Surface; Reflectance spectroscopy; Kramers-Kronig transformation, 583

Ellipsometry; Superlattice; Gallium arsenide, 587
Infrared ellipsometry; Infrared polarizer; FTIR non-linearity; Doped semiconductor; Drude tail, 631
Dielectric functions
Spectroscopic ellipsometry; Characterization of surfaces, interfaces; Real-time monitoring and control; Thin films; Multilayer structures; Non-destructive, 1
Analytic representations; Crystalline Si; Amorphous Si; Silicon nitride, 132
Dielectrics
Spectroscopic ellipsometry; Composition profiling, 389
Diffusion barrier
Ellipsometry; Titanium nitride; Uniformity; Resistivity; TiN, 303
Diffusion doping
Polycrystalline Si; Doped; Ellipsometry, 248
Diluted magnetic semiconductors
Ellipsometry; Hybridization interaction, 183
Dopant distribution
Infrared ellipsometry; Semiconductors; Free carrier absorption, 661
Doped semiconductor
Infrared ellipsometry; Infrared polarizer; FTIR non-linearity; Dielectric function; Drude tail, 631
Doped
Polycrystalline Si; Diffusion doping; Ellipsometry, 248
Drude tail
Infrared ellipsometry; Infrared polarizer; FTIR non-linearity; Dielectric function; Doped semiconductor, 631
Dynamics
Polarization modulated spectroellipsometry; Nematic liquid crystals; Homogeneous–homeotropic transition; Anchoring effect, 799

ECR plasma oxidation
Immersion ellipsometry; Interface roughness; Si; Thermal oxidation, 286
ECR plasma
GaAs; Si; Oxidation; Ellipsometry, 454
Effective medium approximation
Infrared ellipsometry; Optical constants; Metallic island films; SEIRA, 732
Spectroscopic ellipsometry; Nickel hydroxide; Electrochemical precipitation; Inhomogeneous films, 775
Effective medium theory
Real time spectroscopic ellipsometry; Polycrystalline silicon; Solid phase crystallization, 464
Infrared ellipsometry; Mixed-phase thin films; Anisotropy, 692
Ellipsometry; Film growth; Spectroscopy, 51
Electrochemical precipitation
Spectroscopic ellipsometry; Nickel hydroxide; Inhomogeneous films; Effective medium approximation, 775
Electrochromic materials
Ellipsometry; Infrared spectroscopy; Tungsten oxide, 682
Electrochromic thin films
Ellipsometry; Optical monitoring, 62
Electrochromism
Ellipsometry; Tungsten oxide; Nickel oxide, 205
Electronic structure
FeAl alloys; Optical properties; Phase transitions, 228
Surfaces; Optical properties; Semiconductors, 527
Ellipsometry angles
Wavelengths; Resolution; Condition; High performance semantic database, 119
Ellipsometry calculations
Generalized ellipsometry; Anisotropic materials; Mueller matrices; Depolarization; Parameterization of optical functions, 33

Ellipsometry
Interferometer; Zeeman laser; Optical recording, 40
Polarimetry; Optical coatings, 53
Optical monitoring; Electrochromic thin films, 62
Rotating polarizer; Systematic errors, 73
Depolarization; Mixed polarizations; RDS; Wedge-like layer, 97
Optical constants; HgCdTe; In situ characterization, 137
Optical modeling; Dielectric function; Silicon, 161
Diluted magnetic semiconductors; Hybridization interaction, 183
Reflectometry; Silicon nitride; Anti-reflection coating; Photolithography, 198
Electrochromism; Tungsten oxide; Nickel oxide, 205
Optical properties; Amorphous films, 210
Ru_2Si_3; Band structure; Dielectric function; Optical properties, 218
Optical constant; Spectroscopy; Solid optics, 232
Polycrystalline Si; Doped; Diffusion doping, 248
Silicon; Silicon dioxide; Interface, 281
Titanium nitride; Uniformity; Diffusion barrier; Resistivity; TiN, 303
Thin nickel; Molybdenum and nickel nitride films; Optical constants; Multilayer optical models, 314
Inhomogeneous films; Index gradients; Dielectric films, 333
Mercuric iodide; Anisotropic dielectric functions; Surface aging, 351
Birefringence; Thin film, 368
Silicon oxide; Silicon oxynitride; Depth inhomogeneity, 379
Index gradients; Silicon oxynitrides, 384
Plasma etching; Process control; Patterned samples, 398
Scattering; Real-time; Control; Si; SiGe, 406
Nucleation; Modeling; Silicon, 416
Nucleation; Silicon; Silicon dioxide, 424
In-line; Automatic; Mapping; Processing, 446
GaAs; Si; Oxidation; ECR plasma, 454
Real time control; Optical coatings, 484
In situ characterization; Epitaxial growth; InGaAs; HgCdTe, 490
III-V semiconductors; Plasma processing, 501
Film growth; Effective medium theory; Spectroscopy, 516
Gold; Silicon; Plasmons, 522
Reflectance anisotropy spectroscopy; Surface dielectric function; Surface reconstruction; GaAs, 537
Silicon surface; Condensation; Tellurium, 561
Femtosecond laser pulses; Germanium, 568
Photo-modulation; Field; Composition; Real-time; FKO, 579
Superlattice; Gallium arsenide; Dielectric function, 587
Optical properties; Monolayer; Gallium arsenide; Gallium phosphide, 590
Reflection spectroscopy; Gallium arsenide; Multilayers, 594
Reflectivity; Microcavity; Exciton; Semiconductors; Infrared-detector, 599
Reflectance anisotropy spectroscopy; Real-time monitoring; In-situ spectroscopy, 620
Infrared spectroscopy; Synchrotron radiation; Superconductivity, 642
Infrared dielectric function; Free carrier response, 667
Infrared spectroscopy; Amorphous silicon; Silicon dioxide; Optical properties; Structural properties, 671
Infrared spectroscopy; Electrochromic materials; Tungsten oxide, 682
AlGaN; Gallium nitride; Aluminum nitride; Vacuum ultraviolet; Optical properties, 745
Extreme ultraviolet; Polarimetry; Multilayer; Polarizer, 751
Anisotropy; Langmuir monolayers; Air–water interface; Molecular packing, 785
Langmuir–Blodgett film; Fullerene; Surface plasmon, 795
Anisotropic; Plastic, 814

End-point detection
Vertical furnace; In situ ellipsometry; High-temperature refractive indices, 442
Epioptics
Surfaces; Interfaces; Optical spectroscopy, 533
Second harmonic generation; Steps; Silicon(001); Gallium; Resonance, 565
Epitaxial growth
Ellipsometry; In situ characterization; InGaAs; HgCdTe, 490
Epitaxial silicon germanium
Spectroscopic ellipsometry; Refractive index, 237
Epitaxy
Anisotropy; Titanium; Zirconium; Passive films, 756
Etch rate monitoring
Surface roughness; Polycrystalline silicon; Process control, 435
Exciton
Ellipsometry; Reflectivity; Microcavity; Semiconductors; Infrared-detector, 599
Excitons
GaN; Spectroscopic ellipsometry; Reflectance; Valence bands; Reciprocal space analysis, 187
Extraordinary refractive index
Potassium acid phtalate; Spectroscopic ellipsometry; Anisotropic crystals; Ordinary refractive index, 347
Extreme ultraviolet
Ellipsometry; Polarimetry; Multilayer; Polarizer, 751

FKO
Photo-modulation; Ellipsometry; Field; Composition; Real-time, 579
FTIR attenuated total reflection
Sol–gel silicon dioxide films; IR spectroscopic ellipsometry; FTIR transmission; Residual water detection, 722
FTIR non-linearity
Infrared ellipsometry; Infrared polarizer; Dielectric function; Doped semiconductor; Drude tail, 631
FTIR transmission
Sol–gel silicon dioxide films; IR spectroscopic ellipsometry; FTIR attenuated total reflection; Residual water detection, 722
FeAl alloys
Electronic structure; Optical properties; Phase transitions, 228
Feedback control
Spectroscopic ellipsometry (SE); Metalorganic vapour phase epitaxy (MOVPE); InGaAs/InP; Lattice matched growth, 496
Femtosecond laser pulses
Ellipsometry; Germanium, 568
Field
Photo-modulation; Ellipsometry; Composition; Real-time; FKO, 579
Film growth
Ellipsometry; Effective medium theory; Spectroscopy, 516
Film properties
Real-time spectroscopic ellipsometry; Diamond thin films; Surface temperature; Deposition rate, 506
Filtering
Fourier analysis; Critical points; Spectroscopic ellipsometry; Reflectance, 143
Fourier analysis
Critical points; Spectroscopic ellipsometry; Reflectance; Filtering, 143
Free carrier absorption
Infrared ellipsometry; Semiconductors; Dopant distribution, 661
Free carrier response
Ellipsometry; Infrared dielectric function, 667
Fullerene
Ellipsometry; Langmuir–Blodgett film; Surface plasmon, 795

$(GaAs)_n/(Al_xGa_{1-x}As)_n$ superlattices
Infrared ellipsometry; Synchrotron radiation; TO phonon modes, 649
GaAs
Si; Oxidation; ECR plasma; Ellipsometry, 454
Ellipsometry; Reflectance anisotropy spectroscopy; Surface dielectric function; Surface reconstruction, 537
Reflectance-difference spectroscopy (RDS); Anisotropy; Interface; SiO_2/Si; ZnSe, 544
Dielectric function; Second harmonic generation; Microscopic theory; GaP, 574
Surface; Reflectance spectroscopy; Dielectric function; Kramers-Kronig transformation, 583
GaN
Spectroscopic ellipsometry; Reflectance; Valence bands; Excitons; Reciprocal space analysis, 187
GaP
Dielectric function; Second harmonic generation; Microscopic theory; GaAs, 574
Gallium arsenide
Ellipsometry; Superlattice; Dielectric function, 587
Ellipsometry; Optical properties; Monolayer; Gallium phosphide, 590
Ellipsometry; Reflection spectroscopy; Multilayers, 594
Gallium nitride
AlGaN; Aluminum nitride; Ellipsometry; Vacuum ultraviolet; Optical properties, 745
Gallium phosphide
Ellipsometry; Optical properties; Monolayer; Gallium arsenide, 590
Gallium
Second harmonic generation; Steps; Silicon(001); Resonance; Epioptics, 565
Generalized ellipsometry
Ellipsometry calculations; Anisotropic materials; Mueller matrices; Depolarization; Parameterization of optical functions, 33
Optical Jones matrix; Anisotropy; Liquid crystals; Refractive indices; Polycrystalline media; Magneto-optics, 323
Calcite; Optical properties, 341
Optical constants; In-plane anisotropy; Langmuir–Blodgett films, 790
Germanium
Optical properties; Dielectric function; Carbon, 172
Ellipsometry; Femtosecond laser pulses, 568
Glancing angle deposition
Rotating-compensator multichannel ellipsometer; Chiral thin film; Helicoidal bianisotropic medium; Multichannel Stokes vector spectroscopy, 373
Glass transition
Thin polymer films; PMMA; Spectroscopic ellipsometry; Thermal expansion, 803
Global optimization
Silicon on insulator; Beam profile reflectometry; Spectrophotometry, 270
Gold
Ellipsometry; Silicon; Plasmons, 522
Graded layers
Amorphous silicon–carbon alloys; Spectroscopic ellipsometry; Parameterization of dielectric functions, 474
Graded microstructure
Spectroscopic ellipsometry; Indium tin oxide; ITO; Optical constants; Refractive index, 394

HBT
In-situ monitoring; RAS; MOVPE; InP; InGaAs, 609
Heavily doped Si

Infrared ellipsometry; Lattice vibrations; Interband absorption, 656
Helicoidal bianisotropic medium
Rotating-compensator multichannel ellipsometer; Chiral thin film; Glancing angle deposition; Multichannel Stokes vector spectroscopy, 373
HgCdTe
Ellipsometry; Optical constants; In situ characterization, 137
Ellipsometry; In situ characterization; Epitaxial growth; InGaAs, 490
High performance semantic database
Ellipsometry angles; Wavelengths; Resolution; Condition, 119
High-temperature refractive indices
Vertical furnace; In situ ellipsometry; End-point detection, 442
Homogeneous–homeotropic transition
Polarization modulated spectroellipsometry; Nematic liquid crystals; Dynamics; Anchoring effect, 799
Hybridization interaction
Ellipsometry; Diluted magnetic semiconductors, 183
Hydrogenated amorphous silicon (a-Si:H)-based solar cells
Real time spectroscopic ellipsometry (RTSE); microcrystalline silicon (μc-Si:H); Si nanocrystallites, 469

III-V semiconductors
Ellipsometry; Plasma processing, 501
IR spectroscopic ellipsometry
Sol–gel silicon dioxide films; FTIR attenuated total reflection; FTIR transmission; Residual water detection, 722
ITO
Spectroscopic ellipsometry; Indium tin oxide; Optical constants; Refractive index; Graded microstructure, 394
Imaging
Backscattering; Depolarization; Phase modulation; Polarization; Turbidity, 831
Immersion ellipsometry
Interface roughness; Si; Thermal oxidation; ECR plasma oxidation, 286
In situ characterization
Ellipsometry; Optical constants; HgCdTe, 137
Ellipsometry; Epitaxial growth; InGaAs; HgCdTe, 490
In situ diagnostics
Cubic boron nitride; Polarized FTIR reflectometry; VIS ellipsometry, 697
In situ ellipsometry
Non-linear estimation; Poly-Si etching, 156
AFM; Si:H; Atomically flat c-Si(111) surface, 420
Vertical furnace; End-point detection; High-temperature refractive indices, 442
Control; Thickness; Temperature; Wavelength, 479
In situ monitoring/real time monitoring
Spectroscopic ellipsometry; Infrared region; Chemical vapor deposition; Aluminum; Integrated circuit technology, 737
In situ
Spectroscopic ellipsometry; Sputter; Multilayers, 511
In-line
Automatic; Ellipsometry; Mapping; Processing, 446
In-plane anisotropy
Generalized ellipsometry; Optical constants; Langmuir–Blodgett films, 790
In-situ monitoring
Spectroscopic ellipsometry; Kinetic ellipsometry; MOVPE; Arsenic-phosphorus exchange; Organic group V precursors, 604
RAS; MOVPE; InP; InGaAs; HBT, 609
In-situ spectroscopy
Ellipsometry; Reflectance anisotropy spectroscopy; Real-time monitoring, 620
InAlAs dielectric functions
Dielectric function modeling; Process monitoring; Strained layer epitaxy, 177
InGaAs/InP
Spectroscopic ellipsometry (SE); Metalorganic vapour phase epitaxy (MOVPE); Feedback control; Lattice matched growth, 496
InGaAs
Ellipsometry; In situ characterization; Epitaxial growth; HgCdTe, 490
In-situ monitoring; RAS; MOVPE; InP; HBT, 609
InP
In-situ monitoring; RAS; MOVPE; InGaAs; HBT, 609
Incoherent reflection
Spectroscopic phase modulated ellipsometry; Thick transparent substrates, 108
Index gradients
Inhomogeneous films; Ellipsometry; Dielectric films, 333
Ellipsometry; Silicon oxynitrides, 384
Indium tin oxide
Spectroscopic ellipsometry; ITO; Optical constants; Refractive index; Graded microstructure, 394
Infrared dielectric function
Ellipsometry; Free carrier response, 667
Infrared ellipsometry
Infrared polarizer; FTIR non-linearity; Dielectric function; Doped semiconductor; Drude tail, 631
Synchrotron radiation; $(GaAs)_n/(Al_xGa_{1-x}As)_n$ superlattices; TO phonon modes, 649
Lattice vibrations; Interband absorption; Heavily doped Si, 656
Semiconductors; Free carrier absorption; Dopant distribution, 661
Silica; Ion assisted deposition; Visible ellipsometry; Porosity, 676
Reflectivity; Lattice vibrations; Alkali halides, 687
Mixed-phase thin films; Anisotropy; Effective medium theory, 692
Amorphous carbon; Vibrational properties; Interfaces; Ion bombardment; Microstructure, 704
Optical constants; Organic coatings; Layer thickness, 708
Attenuated total reflection; Oxygen plasma; Organic polymer, 713
Attenuated Total Reflection; Lubricants; Water, 718
Optical constants; Metallic island films; Effective medium approximation; SEIRA, 732
Infrared polarizer
Infrared ellipsometry; FTIR non-linearity; Dielectric function; Doped semiconductor; Drude tail, 631
Infrared region
Spectroscopic ellipsometry; In situ monitoring/real time monitoring; Chemical vapor deposition; Aluminum; Integrated circuit technology, 737
Infrared spectroscopy
Ellipsometry; Synchrotron radiation; Superconductivity, 642
Ellipsometry; Amorphous silicon; Silicon dioxide; Optical properties; Structural properties, 671
Ellipsometry; Electrochromic materials; Tungsten oxide, 682
Infrared-detector
Ellipsometry; Reflectivity; Microcavity; Exciton; Semiconductors, 599
Infrared
Spectroscopic ellipsometry; Vibrational properties, 625
Inhomogeneous films
Index gradients; Ellipsometry; Dielectric films, 333
Spectroscopic ellipsometry; Nickel hydroxide; Electrochemical precipitation; Effective medium approximation, 775
Integrated circuit technology
Spectroscopic ellipsometry; Infrared region; In situ monitoring/real time monitoring; Chemical vapor deposition; Aluminum, 737

Interband absorption
Infrared ellipsometry: Lattice vibrations: Heavily doped Si, 656
Interface layer
Silicon dioxide on crystal silicon: Refractive index: Spectroscopic ellipsometry: S-wave antireflection and p-wave anti-reflection, 292
Interface roughness
Immersion ellipsometry: Si: Thermal oxidation: ECR plasma oxidation, 286
Interface
Silicon: Silicon dioxide: Ellipsometry, 281
Reflectance-difference spectroscopy (RDS): Anisotropy: SiO_2/Si: ZnSe: GaN, 544
Interfaces
Epioptics: Surfaces: Optical spectroscopy, 533
Infrared ellipsometry: Amorphous carbon: Vibrational properties: Ion bombardment: Microstructure, 704
Interferometer
Ellipsometry: Zeeman laser: Optical recording, 40
Inverse ellipsometric problem
Spectroscopic ellipsometry: Numerical methods: Solution ambiguity, 128
Spectroscopic ellipsometry: Phase transition: Vanadium dioxide: Mechanism of oxidation, 319
Ion assisted deposition
Silica: Visible ellipsometry: Infrared ellipsometry: Porosity, 676
Ion bombardment
Infrared ellipsometry: Amorphous carbon: Vibrational properties: Interfaces: Microstructure, 704

Kerr effect
$LuFe_2$: Rare earth compounds: Optical conductivity: TB-LMTO, 222
Kinetic ellipsometry
Spectroscopic ellipsometry: MOVPE: In-situ monitoring: Arsenic-phosphorus exchange: Organic group V precursors, 604
Kramers-Kronig transformation
GaAs: Surface: Reflectance spectroscopy: Dielectric function, 583

Langmuir monolayers
Ellipsometry: Anisotropy: Air–water interface: Molecular packing, 785
Langmuir–Blodgett film
Generalized ellipsometry: Optical constants: In-plane anisotropy, 790
Ellipsometry: Fullerene: Surface plasmon, 795
Lattice matched growth
Spectroscopic ellipsometry (SE): Metalorganic vapour phase epitaxy (MOVPE): InGaAs/InP: Feedback control, 496
Lattice vibrations
Infrared ellipsometry: Interband absorption: Heavily doped Si, 656
Infrared ellipsometry: Reflectivity: Alkali halides, 687
Layer thickness
Infrared ellipsometry: Optical constants: Organic coatings, 708
Least-squares analysis
Rotating-compensator ellipsometer (RCE): Pseudodielectric function: Crystalline Si, 58
Liquid crystals
Generalized ellipsometry: Optical Jones matrix: Anisotropy: Refractive indices: Polycrystalline media: Magneto-optics, 323
Localization
Wave packet, 557

$LuFe_2$
Kerr effect: Rare earth compounds: Optical conductivity: TB-LMTO, 222
Lubricants
Infrared ellipsometry: Attenuated Total Reflection: Water, 718

MOVPE
Spectroscopic ellipsometry: Kinetic ellipsometry: In-situ monitoring: Arsenic-phosphorus exchange: Organic group V precursors, 604
In-situ monitoring: RAS: InP: InGaAs: HBT, 609
Magneto-optics
Generalized ellipsometry: Optical Jones matrix: Anisotropy: Liquid crystals: Refractive indices: Polycrystalline media, 323
Mapping
In-line: Automatic: Ellipsometry: Processing, 446
Mechanism of oxidation
Spectroscopic ellipsometry: Phase transition: Vanadium dioxide: Inverse ellipsometric problem, 319
Mercuric iodide
Ellipsometry: Anisotropic dielectric functions: Surface aging, 351
Metallic island films
Infrared ellipsometry: Optical constants: Effective medium approximation: SEIRA, 732
Metalorganic vapour phase epitaxy (MOVPE)
Spectroscopic ellipsometry (SE): InGaAs/InP: Feedback control: Lattice matched growth, 496
Microcavity
Ellipsometry: Reflectivity: Exciton: Semiconductors: Infrared-detector, 599
Microcrystalline silicon (μc-Si:H)
Real time spectroscopic ellipsometry (RTSE): Hydrogenated amorphous silicon (a-Si:H)-based solar cells: Si nanocrystallites, 469
Microscopic theory
Dielectric function: Second harmonic generation: GaAs: GaP, 574
Microspot spectroscopic ellipsometry
Bonded silicon on insulator (SiO_2) on silicon (BOSI): Thickness gradient materials: PCSA spectroscopic ellipsometry: Degree of polarization, 102
Microstructure
Infrared ellipsometry: Amorphous carbon: Vibrational properties: Interfaces: Ion bombardment, 704
Mixed polarizations
Ellipsometry: Depolarization: RDS: Wedge-like layer, 97
Mixed-phase thin films
Infrared ellipsometry: Anisotropy: Effective medium theory, 692
Modeling
Ellipsometry: Nucleation: Silicon, 416
Molecular packing
Ellipsometry: Anisotropy: Langmuir monolayers: Air–water interface, 785
Molecular dynamics
Spectroscopic ellipsometry: Complete wetting: Polymer liquids, 819
Molybdenum and nickel nitride films
Ellipsometry: Thin nickel: Optical constants: Multilayer optical models, 314
Monolayer
Ellipsometry: Optical properties: Gallium arsenide: Gallium phosphide, 590
Mueller matrices
Generalized ellipsometry: Ellipsometry calculations: Anisotropic

materials; Depolarization; Parameterization of optical functions, 33
Mueller matrix of anisotropic samples
Polymer film; Anisotropic thick film; Transmission ellipsometry, 808
Mueller matrix
Polarimeter; Real time; Rough surface; Polarization modulation, 47
Depolarization; NE; RAE; PCSA; PSA, 90
Multichannel SE
Real-time spectroscopic ellipsometry (SE); Rotating-element SE; Thin film nucleation and growth; Nanophase materials; Amorphous semiconductors; Solar cells, 18
Multichannel Stokes vector spectroscopy
Rotating-compensator multichannel ellipsometer; Chiral thin film; Helicoidal bianisotropic medium; Glancing angle deposition, 373
Multilayer optical models
Ellipsometry; Thin nickel; Molybdenum and nickel nitride films; Optical constants, 314
Multilayer structures
Spectroscopic ellipsometry; Dielectric functions; Characterization of surfaces, interfaces; Real-time monitoring and control; Thin films; Non-destructive, 1
Multilayer
Extreme ultraviolet; Ellipsometry; Polarimetry; Polarizer, 751
Multilayers
Atomic force microscopy (AFM); Chemical vapor deposition (CVD); Spectroscopic ellipsometry (SE), 259
In situ; Spectroscopic ellipsometry; Sputter, 511
Ellipsometry; Reflection spectroscopy; Gallium arsenide, 594
Multiple minima
Spectroscopic ellipsometry; Dielectric films, 124
Multiple sample analysis
Spectroscopic ellipsometry; Ta_2O_5; SeN; CeO_2, 114

NE
Depolarization; Mueller matrix; RAE; PCSA; PSA, 90
Nanophase materials
Real-time spectroscopic ellipsometry (SE); Multichannel SE; Rotating-element SE; Thin film nucleation and growth; Amorphous semiconductors; Solar cells, 18
Nematic liquid crystals
Polarization modulated spectroellipsometry; Homogeneous–homeotropic transition; Dynamics; Anchoring effect, 799
Nickel hydroxide
Spectroscopic ellipsometry; Electrochemical precipitation; Inhomogeneous films; Effective medium approximation, 775
Nickel oxide
Electrochromism; Ellipsometry; Tungsten oxide, 205
Non-destructive
Spectroscopic ellipsometry; Dielectric functions; Characterization of surfaces, interfaces; Real-time monitoring and control; Thin films; Multilayer structures, 1
Non-linear estimation
In situ ellipsometry; Poly-Si etching, 156
Nucleation
Ellipsometry; Modeling; Silicon, 416
Ellipsometry; Silicon; Silicon dioxide, 424
Numerical methods
Spectroscopic ellipsometry; Inverse ellipsometric problem; Solution ambiguity, 128

Optical Jones matrix
Generalized ellipsometry; Anisotropy; Liquid crystals; Refractive indices; Polycrystalline media; Magneto-optics, 323
Optical anisotropy
Spectroscopic ellipsometry; Uniaxial; Polymer; Poly(3,4-ethylenedioxythiophene), 356
Optical biosensors
Protein adsorption; Optical properties of proteins; Spectroscopic ellipsometry; Optical gas sensors, 764
Optical coatings
Ellipsometry; Polarimetry, 53
Real time control; Ellipsometry, 484
Optical conductivity
Kerr effect; $LuFe_2$; Rare earth compounds; TB-LMTO, 222
Optical constant
Ellipsometry; Spectroscopy; Solid optics, 232
Optical constants
Spectrogonio(photo)metry; Refraction index; Thickness; Weakly-absorbing thin films; Optical parameters, 85
Ellipsometry; HgCdTe; In situ characterization, 137
Ellipsometry; Thin nickel; Molybdenum and nickel nitride films; Multilayer optical models, 314
Spectroscopic ellipsometry; Indium tin oxide; ITO; Refractive index; Graded microstructure, 394
Infrared ellipsometry; Organic coatings; Layer thickness, 708
Infrared ellipsometry; Metallic island films; Effective medium approximation; SEIRA, 732
Generalized ellipsometry; In-plane anisotropy; Langmuir–Blodgett films, 790
Optical gas sensors
Protein adsorption; Optical properties of proteins; Spectroscopic ellipsometry; Optical biosensors, 764
Optical modeling
Ellipsometry; Dielectric function; Silicon, 161
Optical monitoring
Ellipsometry; Electrochromic thin films, 62
Optical parameters
Spectrogonio(photo)metry; Refraction index; Thickness; Weakly-absorbing thin films; Optical constants, 85
Optical properties of proteins
Protein adsorption; Spectroscopic ellipsometry; Optical biosensors; Optical gas sensors, 764
Optical properties
Dielectric function; Germanium; Carbon, 172
Amorphous films; Ellipsometry, 210
Ru_2Si_3; Band structure; Ellipsometry; Dielectric function, 218
FeAl alloys; Electronic structure; Phase transitions, 228
Generalized ellipsometry; Calcite, 341
Surfaces; Electronic structure; Semiconductors, 527
Ellipsometry; Monolayer; Gallium arsenide; Gallium phosphide, 590
Ellipsometry; Infrared spectroscopy; Amorphous silicon; Silicon dioxide; Structural properties, 671
AlGaN; Gallium nitride; Aluminum nitride; Ellipsometry; Vacuum ultraviolet, 745
Optical recording
Ellipsometry; Interferometer; Zeeman laser, 40
Optical spectroscopy
Epioptics; Surfaces; Interfaces, 533
Optical tracking rate
Spectroellipsometry; Stripping ellipsometry, 781
Ordinary refractive index
Potassium acid phtalate; Spectroscopic ellipsometry; Anisotropic crystals; Extraordinary refractive index, 347
Organic coatings
Infrared ellipsometry; Optical constants; Layer thickness, 708
Organic group V precursors
Spectroscopic ellipsometry; Kinetic ellipsometry; MOVPE; In-situ monitoring; Arsenic-phosphorus exchange, 604
Organic polymer

Infrared ellipsometry; Attenuated total reflection; Oxygen plasma, 713
Oxidation
GaAs; Si; ECR plasma; Ellipsometry, 454
Spectroscopic ellipsometry; Porous silicon; Annealing, 459
Oxygen plasma
Infrared ellipsometry; Attenuated total reflection; Organic polymer, 713

P-polarized reflectance spectroscopy
Pulsed chemical beam epitaxy; Reduced order kinetic model, 614
PCSA spectroscopic ellipsometry
Bonded silicon on insulator (SiO_2) on silicon (BOSI); Thickness gradient materials; Degree of polarization; Microspot spectroscopic ellipsometry, 102
PCSA
Depolarization; Mueller matrix; NE; RAE; PSA, 90
PMMA
Thin polymer films; Glass transition; Spectroscopic ellipsometry; Thermal expansion, 803
PSA
Depolarization; Mueller matrix; NE; RAE; PCSA, 90
Parameterization of dielectric functions
Amorphous silicon–carbon alloys; Spectroscopic ellipsometry; Graded layers, 474
Parameterization of optical functions
Generalized ellipsometry; Ellipsometry calculations; Anisotropic materials; Mueller matrices; Depolarization, 33
Passive films
Anisotropy; Titanium; Zirconium; Epitaxy, 756
Patterned samples
Plasma etching; Ellipsometry; Process control, 398
Phase modulation
Backscattering; Depolarization; Imaging; Polarization; Turbidity, 831
Phase transition
Spectroscopic ellipsometry; Vanadium dioxide; Mechanism of oxidation; Inverse ellipsometric problem, 319
Phase transitions
FeAl alloys; Electronic structure; Optical properties, 228
Photo-modulation
Ellipsometry; Field; Composition; Real-time; FKO, 579
Photolithography
Ellipsometry; Reflectometry; Silicon nitride; Anti-reflection coating, 198
Anti-reflective (AR) coating; Spectroscopic ellipsometry, 742
Piezobirefringence
Stress-optical constants; Band structure; Deformation potentials, 10
Plasma etching
Ellipsometry; Process control; Patterned samples, 398
Plasma immersion ion implantation
Spectroellipsometry; Atomic force microscopy; Rutherford backscattering spectrometry; Surface disorder; Surface roughness, 254
Plasma processing
Ellipsometry; III-V semiconductors, 501
Plasmons
Ellipsometry; Gold; Silicon, 522
Plastic
Anisotropic; Ellipsometry, 814
Polarimeter
Mueller matrix; Real time; Rough surface; Polarization modulation, 47
Polarimetry
Ellipsometry; Optical coatings, 53
Extreme ultraviolet; Ellipsometry; Multilayer; Polarizer, 751
Polarization modulated spectroellipsometry
Nematic liquid crystals; Homogeneous–homeotropic transition; Dynamics; Anchoring effect, 799
Polarization modulation
Mueller matrix; Polarimeter; Real time; Rough surface; , 47
Polarization
Backscattering; Depolarization; Imaging; Phase modulation; Turbidity, 831
Polarized FTIR reflectometry
Cubic boron nitride; In situ diagnostics; VIS ellipsometry, 697
Polarized
Extreme ultraviolet; Ellipsometry; Polarimetry; Multilayer, 751
Poly(3,4-ethylenedioxythiophene)
Spectroscopic ellipsometry; Optical anisotropy; Uniaxial; Polymer, 356
Poly-Si etching
In situ ellipsometry; Non-linear estimation, 156
Polycrystalline Si
Doped; Diffusion doping; Ellipsometry, 248
Polycrystalline media
Generalized ellipsometry; Optical Jones matrix; Anisotropy; Liquid crystals; Refractive indices; Magneto-optics, 323
Polycrystalline silicon
Spectroscopic ellipsometry; Surface roughness; Atomic force microscopy, 243
Surface roughness; Etch rate monitoring; Process control, 435
Real time spectroscopic ellipsometry; Solid phase crystallization; Effective medium theory, 464
Polymer film
Anisotropic thick film; Mueller matrix of anisotropic samples; Transmission ellipsometry, 808
Polymer liquids
Spectroscopic ellipsometry; Complete wetting; Molecular dynamics, 819
Polymer
Spectroscopic ellipsometry; Optical anisotropy; Uniaxial; Poly(3,4-ethylenedioxythiophene), 356
Porosity
Silica; Ion assisted deposition; Visible ellipsometry; Infrared ellipsometry, 676
Porous silicon
Spectroscopic ellipsometry; Annealing; Oxidation, 459
Spectroscopic ellipsometry; Protein adsorption, 825
Porous-Si
Backpropagation neural networks; Spectroscopic ellipsometry; SIMOX, 149
Potassium acid phtalate
Spectroscopic ellipsometry; Anisotropic crystals; Ordinary refractive index; Extraordinary refractive index, 347
Process control
Plasma etching; Ellipsometry; Patterned samples, 398
Surface roughness; Polycrystalline silicon; Etch rate monitoring, 435
Process monitoring
InAlAs dielectric functions; Dielectric function modeling; Strained layer epitaxy, 177
Processing

Beam profile reflectometry: Spectrophotometry: Global optimization. 270
Silicon oxide
Ellipsometry: Silicon oxynitride: Depth inhomogeneity. 379
Silicon oxynitride
Ellipsometry: Silicon oxide: Depth inhomogeneity. 379
Silicon oxynitrides
Ellipsometry: Index gradients. 384
Silicon surface
Ellipsometry: Condensation: Tellurium. 561
Silicon(001)
Second harmonic generation: Steps: Gallium: Resonance: Epioptics. 565
Silicon-germanium
Dielectric function: Spectroscopic ellipsometry: Band gap: Strain. 167
Silicon
Ellipsometry: Optical modeling: Dielectric function. 161
Silicon dioxide: Interface: Ellipsometry. 281
Ellipsometry: Nucleation: Modeling. 416
Ellipsometry: Nucleation: Silicon dioxide. 424
Ellipsometry: Gold: Plasmons. 522
Silver film growth
Real-time spectroscopic ellipsometry (SE): Real-time three-parameter SE: Real-time spectroscopic reflectance: SE calibration. 79
Size dependence
Spectroscopic ellipsometry: SIMOX: Dielectric constants: Si. 264
Sol–gel silicon dioxide films
IR spectroscopic ellipsometry: FTIR attenuated total reflection: FTIR transmission: Residual water detection. 722
Sol-gel method
SE: BST: Cauchy dispersion function. 214
Solar cells
Real-time spectroscopic ellipsometry (SE): Multichannel SE: Rotating-element SE: Thin film nucleation and growth: Nanophase materials: Amorphous semiconductors. 18
Solid optics
Optical constant: Ellipsometry: Spectroscopy. 232
Solid phase crystallization
Real time spectroscopic ellipsometry: Polycrystalline silicon: Effective medium theory. 464
Solution ambiguity
Spectroscopic ellipsometry: Inverse ellipsometric problem: Numerical methods. 128
Spectroellipsometry
Plasma immersion ion implantation: Atomic force microscopy: Rutherford backscattering spectrometry: Surface disorder: Surface roughness. 254
Optical tracking rate: Stripping ellipsometry. 781
Spectrogoniophotometry
Refraction index: Thickness: Weakly-absorbing thin films: Optical constants: Optical parameters. 85

Spectrometry
Beam-profile reflectometry; Beam-profile ellipsometry; Spectroscopic beam-profile ellipsometry; Titanium nitride, 308
Spectrophotometry
Silicon on insulator; Beam profile reflectometry; Global optimization, 270
Spectroscopic anisotropy micro-ellipsometry (SAME)
Anisotropy; $YBa_2Cu_3O_{7-\delta}$, 362
Spectroscopic beam-profile ellipsometry
Spectrometry; Beam-profile reflectometry; Beam-profile ellipsometry; Titanium nitride, 308
Spectroscopic ellipsometry (SE)
Atomic force microscopy (AFM); Chemical vapor deposition (CVD); Multilayers, 259
Metalorganic vapour phase epitaxy (MOVPE); InGaAs/InP; Feedback control; Lattice matched growth, 496
Spectroscopic ellipsometry
Amorphous silicon–carbon alloys; Graded layers; Parameterization of dielectric functions, 474
Spectroscopic ellipsometry
Dielectric functions; Characterization of surfaces, interfaces; Real-time monitoring and control; Thin films; Multilayer structures; Non-destructive, 1
Multiple sample analysis; Ta_2O_5; ScN; CeO_2, 114
Kinetic ellipsometry; MOVPE; In-situ monitoring; Arsenic-phosphorus exchange; Organic group V precursors, 604
Multiple minima; Dielectric films, 124
Inverse ellipsometric problem; Numerical methods; Solution ambiguity, 128
Fourier analysis; Critical points; Reflectance; Filtering, 143
Backpropagation neural networks; SIMOX; Porous-Si, 149
Silicon-germanium; Dielectric function; Band gap; Strain, 167
GaN; Reflectance; Valence bands; Excitons; Reciprocal space analysis, 187
Silicon nitride; Amorphous materials; Tauc-Lorentz; Anti-reflection coatings, 193
Epitaxial silicon germanium; Refractive index, 237
Polycrystalline silicon; Surface roughness; Atomic force microscopy, 243
SIMOX; Dielectric constants; Si; Size dependence, 264
Wafer bonding; Atomic force microscopy; Silicon materials; Tungsten silicide, 276
Silicon dioxide on crystal silicon; Refractive index; Interface layer; S-wave antireflection and p-wave anti-reflection, 292
Thin film; Semiconductor; Silicon nitride film, 298
Phase transition; Vanadium dioxide; Mechanism of oxidation; Inverse ellipsometric problem, 319
Potassium acid phtalate; Anisotropic crystals; Ordinary refractive index; Extraordinary refractive index, 347
Optical anisotropy; Uniaxial; Polymer; Poly(3,4-ethylenedioxythiophene), 356
Composition profiling; Dielectrics, 389
Indium tin oxide; ITO; Optical constants; Refractive index; Graded microstructure, 394
Vacuum ultraviolet; Silicon homoepitaxy; Recrystallization, 430
Porous silicon; Annealing; Oxidation, 459
In situ; Sputter; Multilayers, 511
Infrared; Vibrational properties, 625
Infrared region; In situ monitoring/real time monitoring; Chemical vapor deposition; Aluminum; Integrated circuit technology, 737
Anti-reflective (AR) coating; Photolithography, 742
Protein adsorption; Optical properties of proteins; Optical biosensors; Optical gas sensors, 764
Nickel hydroxide; Electrochemical precipitation; Inhomogeneous films; Effective medium approximation, 775
Thin polymer films; Glass transition; PMMA; Thermal expansion, 803
Complete wetting; Molecular dynamics; Polymer liquids, 819
Porous silicon; Protein adsorption, 825
Spectroscopic phase modulated ellipsometry
Incoherent reflection; Thick transparent substrates, 108
Spectroscopy
Optical constant; Ellipsometry; Solid optics, 232
Ellipsometry; Film growth; Effective medium theory, 516
Sputter
In situ; Spectroscopic ellipsometry; Multilayers, 511
Steps
Second harmonic generation; Silicon(001); Gallium; Resonance; Epioptics, 565
Strain
Silicon-germanium; Dielectric function; Spectroscopic ellipsometry; Band gap, 167
Strained layer epitaxy
InAlAs dielectric functions; Dielectric function modeling; Process monitoring, 177
Stress-optical constants
Piezobirefringence; Band structure; Deformation potentials, 10
Stripping ellipsometry
Optical tracking rate; Spectroellipsometry, 781
Structural properties
Ellipsometry; Infrared spectroscopy; Amorphous silicon; Silicon dioxide; Optical properties, 671
Superconductivity
Infrared spectroscopy; Ellipsometry; Synchrotron radiation, 642
Superlattice
Ellipsometry; Gallium arsenide; Dielectric function, 587
Surface aging
Ellipsometry; Mercuric iodide; Anisotropic dielectric functions, 351
Surface dielectric function
Ellipsometry; Reflectance anisotropy spectroscopy; Surface reconstruction; GaAs, 537
Surface disorder
Plasma immersion ion implantation; Spectroellipsometry; Atomic force microscopy; Rutherford backscattering spectrometry; Surface roughness, 254
Surface plasmon
Ellipsometry; Langmuir–Blodgett film; Fullerene, 795
Surface reconstruction
Ellipsometry; Reflectance anisotropy spectroscopy; Surface dielectric function; GaAs, 537
Surface roughness
Polycrystalline silicon; Spectroscopic ellipsometry; Atomic force microscopy, 243
Plasma immersion ion implantation; Spectroellipsometry; Atomic force microscopy; Rutherford backscattering spectrometry; Surface disorder, 254
Polycrystalline silicon; Etch rate monitoring; Process control, 435
Surface temperature
Real-time spectroscopic ellipsometry; Diamond thin films; Deposition rate; Film properties, 506
Surface
GaAs; Reflectance spectroscopy; Dielectric function; Kramers-Kronig transformation, 583
Surfaces
Optical properties; Electronic structure; Semiconductors, 527
Epioptics; Interfaces; Optical spectroscopy, 533
Synchrotron radiation
Infrared spectroscopy; Ellipsometry; Superconductivity, 642
Infrared ellipsometry; $(GaAs)_n/(Al_xGa_{1-x}As)_n$ superlattices; TO phonon modes, 649

Systematic errors
Ellipsometry: Rotating polarizer, 73

TB-LMTO
Kerr effect: $LuFe_2$: Rare earth compounds: Optical conductivity, 222
TO phonon modes
Infrared ellipsometry: Synchrotron radiation: $(GaAs)_n/(Al_xGa_{1-x}As)_n$ superlattices, 649
Ta_2O_5
Spectroscopic ellipsometry: Multiple sample analysis: ScN: CeO_2, 114
Tauc-Lorentz
Silicon nitride: Spectroscopic ellipsometry: Amorphous materials: Anti-reflection coatings, 193
Tellurium
Ellipsometry: Silicon surface: Condensation, 561
Temperature
In situ ellipsometry: Control: Thickness: Wavelength, 479
Thermal expansion
Thin polymer films: Glass transition: PMMA: Spectroscopic ellipsometry, 803
Thermal oxidation
Immersion ellipsometry: Interface roughness: Si: ECR plasma oxidation, 286
Thick transparent substrates
Incoherent reflection: Spectroscopic phase modulated ellipsometry, 108
Thickness gradient materials
Bonded silicon on insulator (SiO_2) on silicon (BOSI): PCSA spectroscopic ellipsometry: Degree of polarization: Microspot spectroscopic ellipsometry, 102
Thickness
Spectrogoniot(photo)metry: Refraction index: Weakly-absorbing thin films: Optical constants: Optical parameters, 85
In situ ellipsometry: Control: Temperature: Wavelength, 479
Thin film nucleation and growth
Real-time spectroscopic ellipsometry (SE): Multichannel SE: Rotating-element SE: Nanophase materials: Amorphous semiconductors: Solar cells, 18
Thin film
Spectroscopic ellipsometry: Semiconductor: Silicon nitride film, 298
Birefringence: Ellipsometry, 368
Thin films
Spectroscopic ellipsometry: Dielectric functions: Characterization of surfaces, interfaces: Real-time monitoring and control: Multilayer structures: Non-destructive, 1
Thin nickel
Ellipsometry: Molybdenum and nickel nitride films: Optical constants: Multilayer optical models, 314
Thin polymer films
Glass transition: PMMA: Spectroscopic ellipsometry: Thermal expansion, 803
TiN
Ellipsometry: Titanium nitride: Uniformity: Diffusion barrier: Resistivity, 303
Titanium nitride
Ellipsometry: Uniformity: Diffusion barrier: Resistivity: TiN, 303
Spectrometry: Beam-profile reflectometry: Beam-profile ellipsometry: Spectroscopic beam-profile ellipsometry, 308
Titanium
Anisotropy: Zirconium: Passive films: Epitaxy, 756
Transmission ellipsometry
Polymer film: Anisotropic thick film: Mueller matrix of anisotropic samples, 808
Transparent materials
Compensator ellipsometry: X-ray specular reflectivity, 68
Tungsten oxide
Electrochromism: Ellipsometry: Nickel oxide, 205
Ellipsometry: Infrared spectroscopy: Electrochromic materials, 682
Tungsten silicide
Wafer bonding: Spectroscopic ellipsometry: Atomic force microscopy: Silicon materials, 276
Turbidity
Backscattering: Depolarization: Imaging: Phase modulation: Polarization, 831

Uniaxial
Spectroscopic ellipsometry: Optical anisotropy: Polymer: Poly(3,4-ethylenedioxythiophene), 356
Uniformity
Ellipsometry: Titanium nitride: Diffusion barrier: Resistivity: TiN, 303

VIS ellipsometry
Cubic boron nitride: In situ diagnostics: Polarized FTIR reflectometry, 697
Vacuum ultraviolet
Spectroscopic ellipsometry: Silicon homoepitaxy: Recrystallization, 430
AlGaN: Gallium nitride: Aluminum nitride: Ellipsometry: Optical properties, 745
Valence bands
GaN: Spectroscopic ellipsometry: Reflectance: Excitons: Reciprocal space analysis, 187
Vanadium dioxide
Spectroscopic ellipsometry: Phase transition: Mechanism of oxidation: Inverse ellipsometric problem, 319
Vertical furnace
In situ ellipsometry: End-point detection: High-temperature refractive indices, 442
Vibrational properties
Spectroscopic ellipsometry: Infrared, 625
Infrared ellipsometry: Amorphous carbon: Interfaces: Ion bombardment: Microstructure, 704
Visible ellipsometry
Silica: Ion assisted deposition: Infrared ellipsometry: Porosity, 676

Wafer bonding
Spectroscopic ellipsometry: Atomic force microscopy: Silicon materials: Tungsten silicide, 276
Water
Infrared ellipsometry: Attenuated Total Reflection: Lubricants, 718
Wave packet
Localization, 557
Wavelength
In situ ellipsometry: Control: Thickness: Temperature, 479
Wavelengths
Ellipsometry angles: Resolution: Condition: High performance semantic database, 119
Weakly-absorbing thin films
Spectrogoniot(photo)metry: Refraction index: Thickness: Optical constants: Optical parameters, 85
Wedge-like layer
Ellipsometry: Depolarization: Mixed polarizations: RDS, 97

X-ray specular reflectivity
Compensator ellipsometry: Transparent materials, 68

$YBa_2Cu_3O_{7-\delta}$
Anisotropy; Spectroscopic anisotropy micro-ellipsometry (SAME); 362

Zeeman laser
Ellipsometry; Interferometer; Optical recording, 40

Zirconium
Anisotropy; Titanium; Passive films; Epitaxy, 756

ZnSe
Reflectance-difference spectroscopy (RDS); Anisotropy; Interface; SiO_2/Si; GaN, 544
